Key Comments :

1. The comparison table shows a halving in the '6-10 years' age group census data - down from 59 in 2001 to 32 in 2011 pupils (ie a 46% drop), which is likely to have been one of the key factors impacting upon the decline in Mattersey primary school numbers. NP Survey questionnaire shows only 18 pupils, but the Mattersey school is actually running with approx 35 pupils.

2. Similarly, the '25-44 years' group reduced by 32 from 196 in 2001 to 174 in 2011 (ie a 16% drop). When viewed alongside the reduction in primary school children it signals a worrying trend, where it appears that young couples with children are not coming into the village to raise their families.

3. The Census data for '60-74 years' age group increased from 121 in 2001 to 172 in 2011 (ie a 42% rise) which shows that the village population is gradually getting older. This group grew from 16% in 2001 to 22% in 2011 of all residents. Over 75's also increased from 42 in 2001 (5%) to 54 by 2011 (7%). 23% of residents were over 60 years old in 2011.

4. The Neighbourhood Plan survey captured the details and opinions for approximately half of the village residents.

Notes :

1. 2001 Census Table : Tenure (KS18)

2. 2011 Census Table : Tenure (KS402EW)

3. The Census asked respondents to identify who their landlord is and the results reflect the responses they gave. In the past decade half of the local authorities in Wales have transferred the management of all their local authority housing stock to other social landlords. Individuals responding to the Census will report their understanding of their landlord and this may not reflect the actual management arrangements in all cases.
